

SALVATION

Forced into the rain
Body feeling the strain
Mind on overload again
Glass seal in the pain

Thoughts shifting though
You helped when I needed you
Focus on a shift in view
Not so easy when darkness ensues

I'll take what I have learned
Strength is grown steady and earned
Falter and push on through
Seize what you need to do - it's up to you

Gravitate through my soul
Balance through thought to hold
Endure it all and you will find
A lie to leave behind - unwind

Looking at clear blue sky
Wind so clean dreams float by
Arms outstretched accept it in
Souls set free with no one's sin

I'll take what I have learned
Strength is grown steady and earned
Falter and push on through
Seize what you need to do - it's up to you

Walls crumble and shelter is found
Walk above on solid ground
Follow through love inbound
Heartbeat healthy a lovely sound

I'll take what I have learned
Strength is grown steady and earned
Falter and push on through
Seize what you need to do - it's up to you

I'll take what I have learned
Strength is grown steady and earned
Falter and push on through
Seize what you need to do - it's up to you
